The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history, without adjustment for sales loads. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating™ for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating™ metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. Zevenbergen Genea Fund was rated against the following numbers of Large Growth Funds over the following time periods: 970 funds in the last three years and 920 funds in the last five years. With respect to these Large Growth Funds, Zevenbergen Genea Fund received a Morningstar Rating of 2 stars for the three-year period and 1 star for the five-year period.

The fund's investment objectives, risks, charges and expenses must be considered carefully before investing. The statutory and summary prospectus contain this and other important information about the investment company, and may be obtained by calling 1.844.986.2746, or visiting www.zci.com/funds. Read carefully before investing.
Mutual fund investing involves risk, including the loss of principal. The Funds invest in foreign securities which involve greater volatility and political, economic and currency risks and differences in accounting methods. Non-diversified funds may hold a significant percentage of their assets in the securities of fewer companies and therefore events affecting those companies have a greater impact on the funds than on a diversified fund. If the Funds invest in a few sectors they may have increased exposure to price movements of those sectors. Small and medium capitalization companies tend to have limited liquidity and greater price volatility than large capitalization companies. Zevenbergen Capital Investments LLC (ZCI) is the investment adviser of the Zevenbergen Funds which are distributed by Quasar Distributors, LLC.
