

Zevenbergen Genea Growth Equity 2Q2026

ZVNBGRGN[®]
zevenbergen capital investments

Strategy Inception Date: 02/28/1994

Strategy AUM: \$183.0M

Total Firm AUM: \$4.5B

Investment Overview

The Zevenbergen Genea Growth Equity strategy seeks long-term capital appreciation by investing in emerging companies in industries benefiting from technological advancement that exhibit strong growth expectations. A strong independent approach to research and disciplined active management aims to preserve objectivity from Wall Street biases to help capture meaningful potential return advantages.

Key Features

High-Growth Focus:

- Innovative and disruptive high-growth companies, often founder led.
- Prioritize long-term growth and free cash flow generation over maximizing short-term profits.

Rigorous Fundamental Research:

- Bottom-up analysis focusing on positive revenue, cash flow and earnings growth.
- Differentiated products or services in large addressable markets.

High-Conviction Portfolio:

- Emphasizes a tailored selection of high conviction positions to enhance growth potential.
- Long-term investment focus.
- Low-turnover with high Active Share.

Important Disclosures (as of 06/30/2026)

Investing involves risk, including the possible loss of principal and fluctuation in value.

Zevenbergen Capital's (ZCI) Zevenbergen Genea Growth Equity Composite (Composite) contains fully discretionary tax-exempt, fee-paying accounts managed in the Zevenbergen Genea Growth Equity investment style. The strategy is capital appreciation characterized by concentrated portfolios (generally 20-40 securities) and limited income generation and is generally fully-invested at all times. The strategy exhibits sector concentration, investing in growth companies with primary emphasis in the technology and telecommunications industries. Portfolios in the strategy typically invest in high-growth companies of any market capitalization which at times can exhibit substantially greater volatility than the stock market as a whole. The Russell 3000® Growth Index has been chosen as the performance benchmark by virtue of its similar capitalization ranges and fundamental growth characteristics when compared to the strategy. Performance for the Index does not include investment management fees, brokerage commissions and other expenses associated with investing in equity securities.

Performance data quoted represents past performance; past performance does not guarantee future results. All returns are net of transaction costs and reflect the reinvestment of dividends and other earnings. Gross of fees performance is shown prior to the deduction of realized management fees, and composite net of fees performance reflects the deduction of a model management fee of 1.00% applied monthly. Foreign withholding taxes and other expenses may be incurred in the management of an account which will reduce all returns. Actual investment advisory fees incurred by clients may vary. All composite returns presented are time-weighted and reflective of realized and unrealized gains and losses. ZCI's standard fee schedule for separately managed accounts begins at 1.00% for both Wealth Management and Institutional clients. Advisory fees are further described in Part 2A of ZCI's Form ADV. Unless otherwise noted, performance for the referenced indices do not include investment management fees, brokerage commissions and other expenses associate with investing in equity securities.

Prospective clients should recognize the limitations inherent in composites and should consider all information regarding the firm's investment management capabilities.

The Market Sector Weights, Market Capitalization, Portfolio Characteristics, and Top 10 Holdings were obtained from a representative client portfolio in the Composite. Holdings and Market Sector Weights are subject to change and should not be considered a recommendation to buy or sell any security. A complete list of ZCI's holdings over the preceding 12 months is available upon request. It should not be assumed that recommendations made in the future will be profitable or will equal the performance of the securities in this list.

Market Sector Weights, Characteristics Source: Factset. Composite Standard Deviation (Annualized): MPI Stylus.

Market Capitalization Source: Morningstar, Inc. Market Capitalization Ranges (\$ Billions): Giant = \$677 & above; Large= \$677 – 89; Medium = \$89 – \$15; Small = \$15– \$4; Micro = \$4 & below.

Portfolio Characteristics data shown represents the aggregate of all securities held in the representative client portfolio. All performance-related statistics presented do not represent actual performance and are gross of all fees and expenses that an investor would have paid, except where specifically noted. To understand the overall impact of fees, please review the composite performance returns provided.

Historical Sales Growth – 3 Year: calculated as the compound annual growth rate of a company's revenue over the most recent three fiscal years.

Projected 1yr Sales (Revenue) Growth: measures the percentage change in a company's sales revenue, serving as a key indicator of how the business is expanding revenue.

Price/Sales: calculated by dividing stock price by the previous 12 months sales per share.

Debt/Capital: this characteristic shows the relationship between holdings' debt and total capital. Debt is defined as the sum of total long-term debt, other liabilities, deferred taxes and investment tax credits, and minority interest for the most recent quarter available. This sum is divided by capital (defined as the sum of debt, total common equity, and total preferred stock) for the most recent quarter available.

Weighted Median Market Cap: the weighted midpoint of the range of market capitalizations of equities held in a position where half the assets are invested in capitalizations larger than and the remaining half are invested in capitalizations smaller than the midpoint.

Composite Standard Deviation (Annualized): a statistical measure which quantifies the variability in an investment or index return, with a higher value indicating a greater risk due to wider variations from the average return.

Active Share: a measure of how much the portfolio differs from the benchmark index.

Russell 3000® Growth: this index measures the performance of those Russell 3000 Index companies with higher price-to-book ratios and higher forecasted growth values. One cannot invest directly in an index. Russell Indices are trademarks of the London Stock Exchange Group. Source data provided by the London Stock Exchange Group.
